## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 15 and 32 are rejected under 35 U.S.C. 103(a) as being unpatentable over Kurnik (US 6,272,364) as modified by Hiroi et al (US 5,745,362)

Kurnik discloses in column 23, lines 34-58 a method of obtaining the blood glucose concentration of a user, generating commands through the use of a controller, infusing a liquid based on the controller commands, and estimating a hypoglycemic glucose excursion.

Kurnik discloses the claimed invention except for the controller being a bilinear PID controller. Hiroi et al teach that it is known to use a PID controller as set forth in column 3, lines 3-21 to provide a more accurate control system. It would have been obvious to one having ordinary skill in the art at the time the invention was made to modify the method as taught by Kurnik with a bilinear PID controller as taught by Hiroi et al, since such a modification would provide the method with a more accurate control system.

### *Response to Arguments*

1. Applicant's arguments with respect to claims 16 and 32 have been considered but are moot in view of the new ground(s) of rejection.

A handwritten signature in black ink, appearing to read "Sho/02", is located in the bottom right corner of the page.

Art Unit: 3767

2. Applicant's arguments, see Response, filed 3/17/2006, with respect to claims 15 and 31 have been fully considered and are persuasive. The objection of claims 15 and 31 has been withdrawn.
